

## Key Personnel

### Why Ivan has been chosen for this project –

Ivan has 5 years' experience in the road surfacing industry and has gained extensive knowledge through various positions held whilst working on various surfacing projects throughout south east Queensland. Ivan's experience encompasses spray & seal design, various road surfacing applications and asphalt manufacturing processes.

As a project Engineer, Ivan brings energy to the Colas solutions team, with a vital role in preparing, coordinating and monitoring projects. Ivan is also proficient in spray & seal design which has been built on from experience throughout his career.

Ivan also holds an additional qualification in project management; which has assisted in developing skills and knowledge required to assist his fellow team members in delivering various projects.

### What Ivan will bring to the project

- Detailed knowledge of surfacing application to ensure the correct process and products are used to achieve the optimum result for the client.
- Detailed knowledge increasing efficiency through program of work to maximize revenue
