

SRS SEALCOAT +

HIGH PERFORMANCE BITUMINOUS PAVEMENT PROTECTION

Your airport pavement is under constant attack.

You need the protection of a safe,
environmentally friendly material that fights back
with its own powerful, clean chemistry.

WHAT IS SRS SEALCOAT + ?

SRS SealCoat + is a micro-surfacing sealant designed to extend the life of existing bituminous surfaces. By combining SRS SealCoat's high adhesive characteristics with polymer modifiers and varied quantities of solids to suit the condition of individual pavements, SRS SealCoat will seal and protect your pavement.

Asphalt and spray seal surfaces are under constant attack! Sun, rain and hail all take their toll. If the pavement isn't protected it will deteriorate, weaken and begin to shed particles as the binder becomes brittle and fails.

The loss of larger stones, cracking, water penetration and accelerated failure with time. Without timely intervention with SRS SealCoat, the cost of repairing pavement increases substantially.
